

A diagram of a lattice tower standing on a gray rectangular base. The tower is composed of a series of stacked diamond-shaped lattice sections. To the left of the tower, a vertical double-headed arrow indicates the total height, labeled with the variable z . A horizontal line extends from the top of this arrow to the top of the tower. To the right of the tower, two wavy vertical lines with upward-pointing arrows represent waves. The lower wave is labeled with the symbol λ_0 .
